SHUT OFF 90 VALVE 19 TANG. ON PIPE

Clean and Aseptic Valves of CAD Product Line have simple and safe design, with their full drainability, without asymptotic seal and dead leg, are offering fast cleanability and sterilization practices. They are designed to fulfil stringent demands of CIP-SIP and Production Cycles on Aseptic Processing.

YL## - SOCL - Tangential Shut Off on Pipe Valves for SAFE areas designed to feed or take off fluids or gases from the process piping with Zero dead leg. Valve inlet is tangential on pipe allowing full drainability of the pipeline through the horizontal valve assembly. Body shape and their internal design offer a very reliable component for Aseptic Processing Application. Standard version are short butt weld ends but, on demand, may be delivered for orbital welding or with Tri-Clamp connections.

 External surface $Ra \leq 0.5\mu m$ (20 μin)

Surface Treatment: Available also on EP version - Eletropolishing after manual polished

Labeling: Each valve body is labeled for full LOT traceability

Packaging: Valve body is sealed in plastic bags and packaged in a closed box with Operating and Maintenance bulletin, Certificate of Conformity and Materials Certification 3.1

Quality Control: Quality Assurance System guarantees the control and traceability of the product.

Rules Compliances: CAD valve are on going to be classified for PED Directive 97/23/EC and fulfill ASME BPE Standards
